- To ensure we have time to catch errors or production issues, art MUST be in by the due date, preferably earlier.

Print Ad Production Formats

Files should be supplied in one of the following application formats:

- High Resolution PDF's (PDF/X compliant or Press Quality); remove any security.
- Adobe InDesign .INDD
- Adobe Photoshop .PSD (see note under **Fonts**)*
- Adobe Illustrator .EPS
- TIFF

Digital Issue Ad version

- All ads will be optimized for the digital version of the magazine in house. Send only print version ads and we will convert those to digital.
- Provide the link you would like associated with your ad—we will add it as a click-through link.

Ad Quality Checks

Producing your Images

- Must be 300 dpi or higher
- All color ads/images MUST be CMYK and not exceed 300% ink coverage. *If we are sent RGB, we will convert it to CMYK in house but cannot be responsible for color changes.*
- Black and white images must be in grayscale or bit-mapped formats

Fonts

- All Fonts must be included/embedded. Even if it's a common font, we may not have the same version as you and our programs may substitute other fonts if it is not available.
- *Avoid 4-color black text (most commonly occurs when adding black text to graphics in Photoshop and can result in blurry text—add text separately in InDesign or other layout program or change color in properties window to CMYK reading 100-0-0-0).
